

Screen visualization

The graphical adaptation of the overview and text pages of the CD-ROM “Digital Wood Joints“ was optimized for the visualization on a 17 inch monitor with a resolution of 1024 x 768 pixels and 32,000 colors.

For the visualization of Acrobat documents on your screen, you can define the default magnification, the page layout and other options, like the mode for displaying large images in the General Preferences menu in Preferences. These set ups will from then on be applied to all PDF-documents, which you open in the standard view.
